Art Unit: 2644

DETAILED ACTION

1. This communication is responsive to the applicant's amendment dated 10/05/2005.

2. Claims 28 and 44 are objected to because of the following informalities:

Claim 28 is depending on cancelled claim 23, it appears should be depending on claim 27 (and is being treated as such in this office action);

Line 4 of claim 44, 'characteristic of a reference device;' is repeated as recited in line 3. Appropriate correction is required.

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Art Unit: 2644

4. Claims 43-44 are rejected under 35 U.S.C. 102(e) as being anticipated by Opitz (US-6,519,342).

Regarding claim 44, Optiz discloses an apparatus and method for applying an impulse response to an audio signal having means for storing data representing a plurality of characteristics of a reference device (audio signals with impulse responses for different desired filtering effect, see Abstract); a manual input to select an stored impulse response to be applied to an input signal (col. 6, lines 14-19); and means for applying the selected stored impulse response to the input signal (see Figure 10 and col. 2, lines 61-65).

Method claim 43 is rejected for the same reasoning as set forth for the rejection of apparatus claim 44 above since the apparatus claims perform the same functions as the method claims.

5. Claims 27-40 and 55-56 are allowed over prior art of record.

6. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is

reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
